

New: sign documents with your finger

Files to people. Fast and in full quality.

Send, request, move between phone and computer, and get it signed. Recipients need no account.

movemyfile.eu

SOUND FAMILIAR?

Sending files is still a pain

Blurry photos

WhatsApp shrinks photos. Your client gets a preview, not the original.

Attachment too large

Email stops at around 25 MB. Drawings and videos won't fit.

Yet another account

Shared drives want a sign-up, and the other side gets lost.

With MoveMyFile, **one link or QR code** is all it takes. Everything arrives in full quality.

EMAIL

~~25 MB~~

MOVEMYFILE

50 GB

A single file up to 50 GB on the team plan, up to 2 GB for free. No monthly transfer limit.

HOW IT WORKS

Three steps. Done.

A blue circle with the number 1 inside.

Upload

From your computer or phone.
Photos stay in full quality.

A blue circle with the number 2 inside.

Send

To one person or the whole crew,
by link, QR code or SMS from your
own phone.

An orange circle with the number 3 inside.

Keep a record

Who opened and downloaded
what. Save the handover protocol
as a PDF.

SEND

Link and QR code

Send the link in a message. Show the QR code to the person next to you and their phone opens it straight away.

-  PIN, password, one-time download
-  Expiry, extend, withdraw
-  Recipients need no account or install

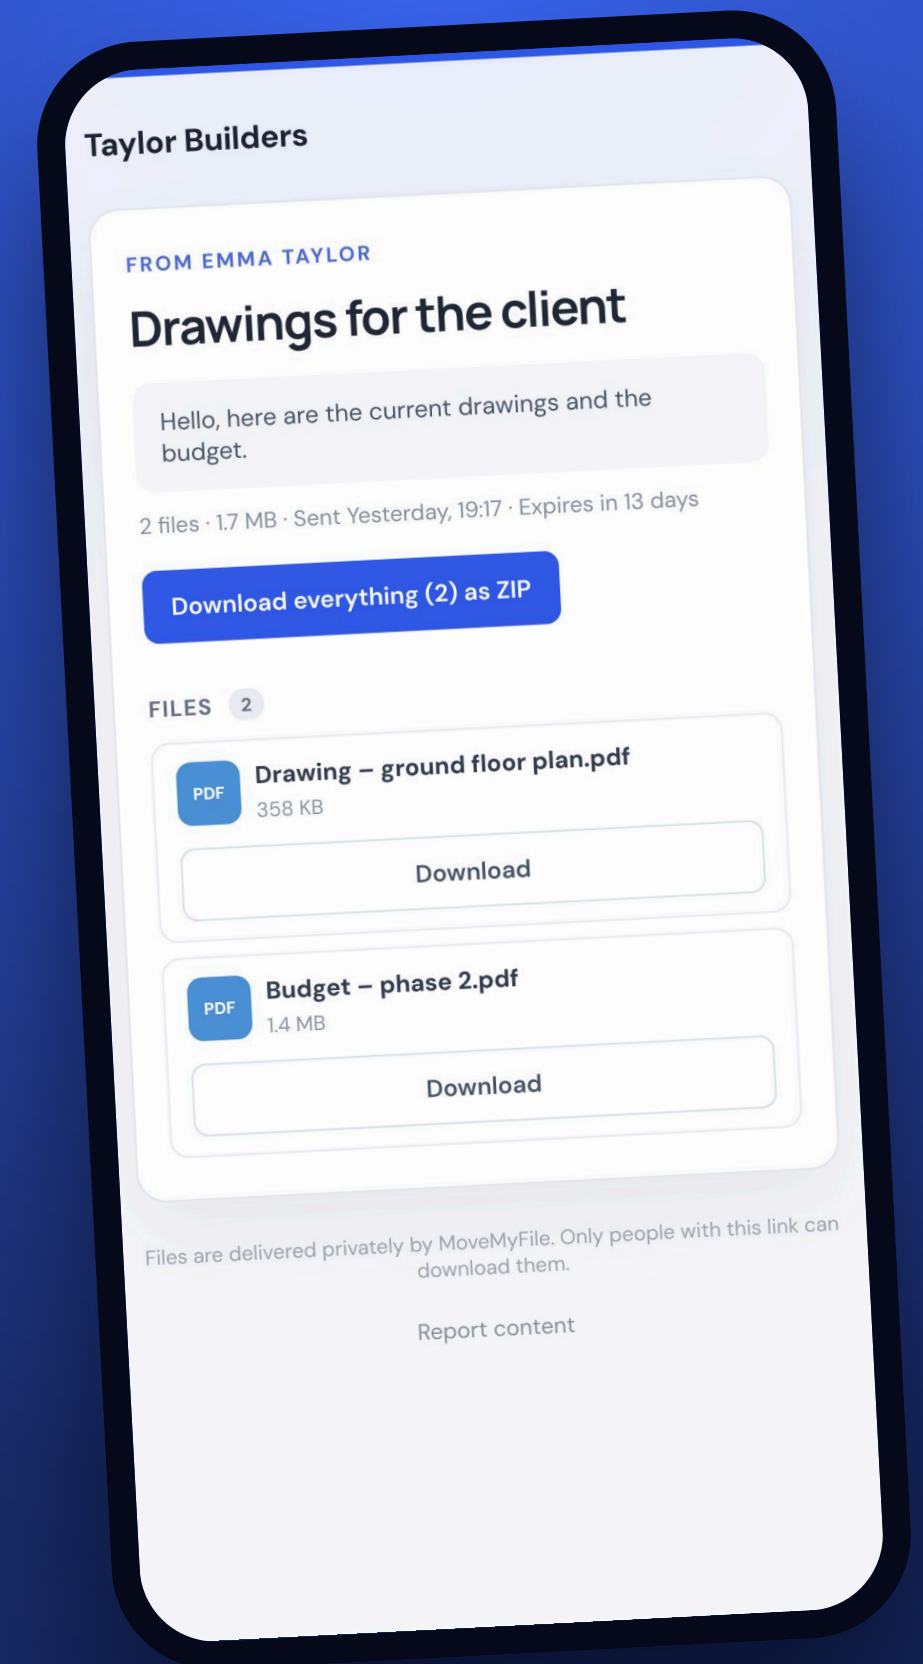

RECIPIENT

Open. Download. Done.

On phone or computer. They see who the files are from, your message and the expiry. They download them one by one, or all as a ZIP.

No app, no sign-up

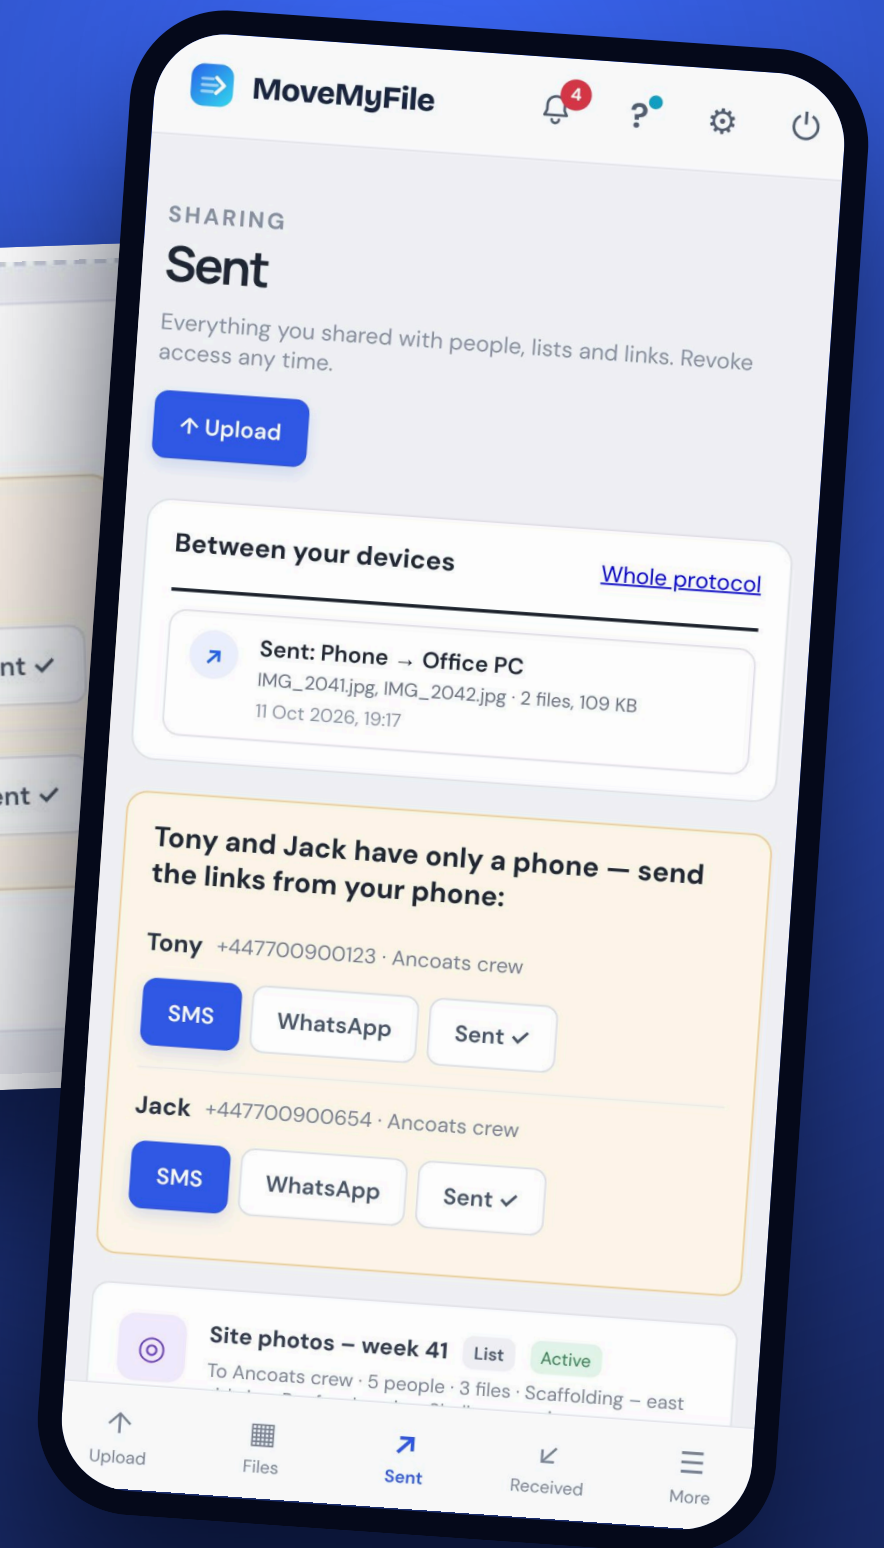

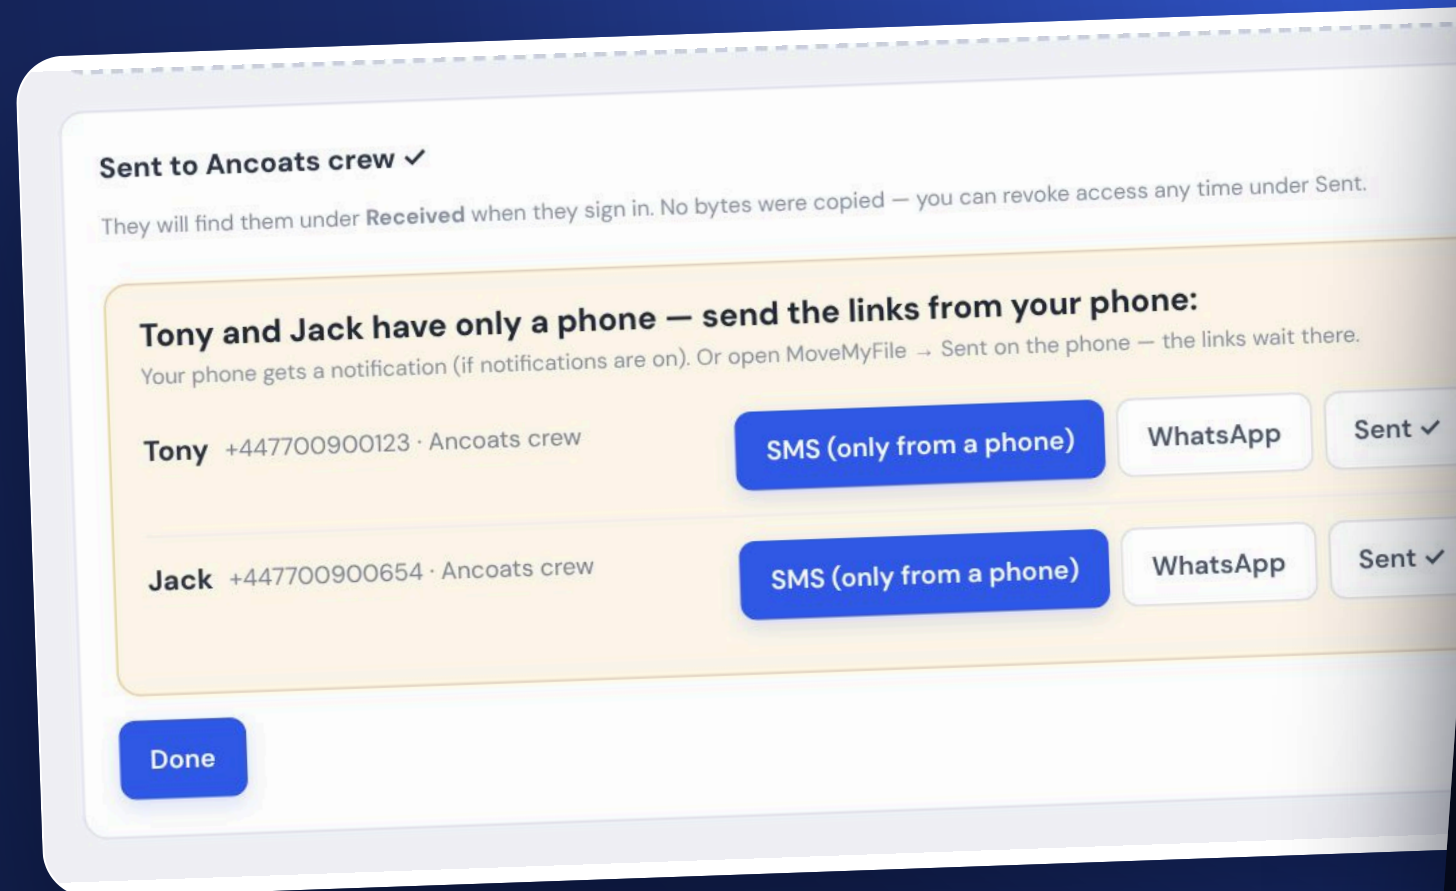

LISTS

One send for the whole crew

MoveMyFile users, people with just an email address and people with just a phone.

For people with just a phone, send the link by SMS or WhatsApp from your own mobile. The app reminds you.

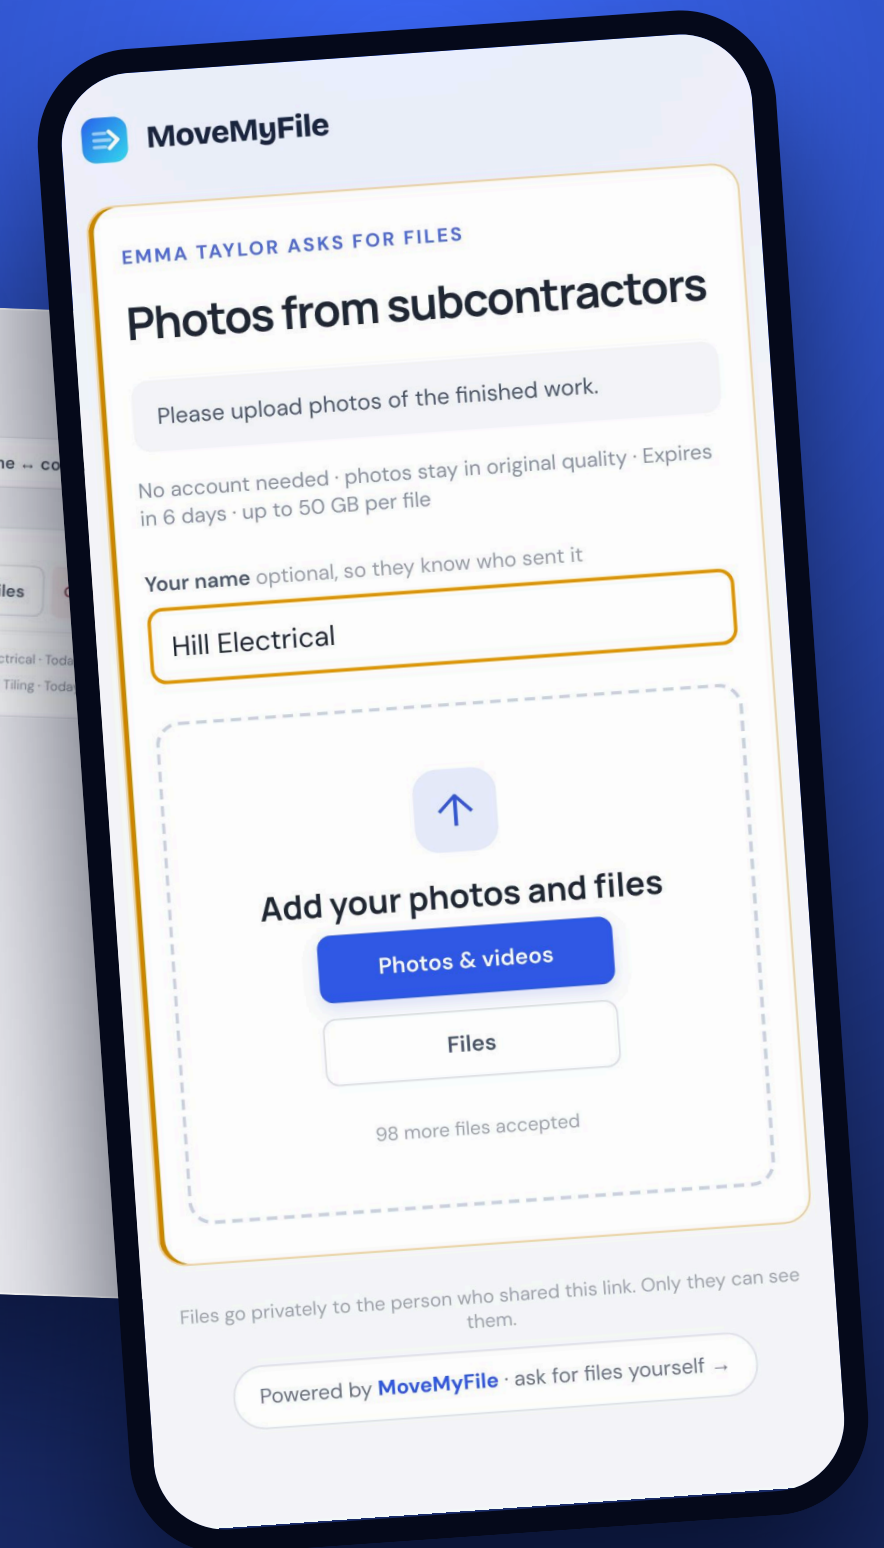

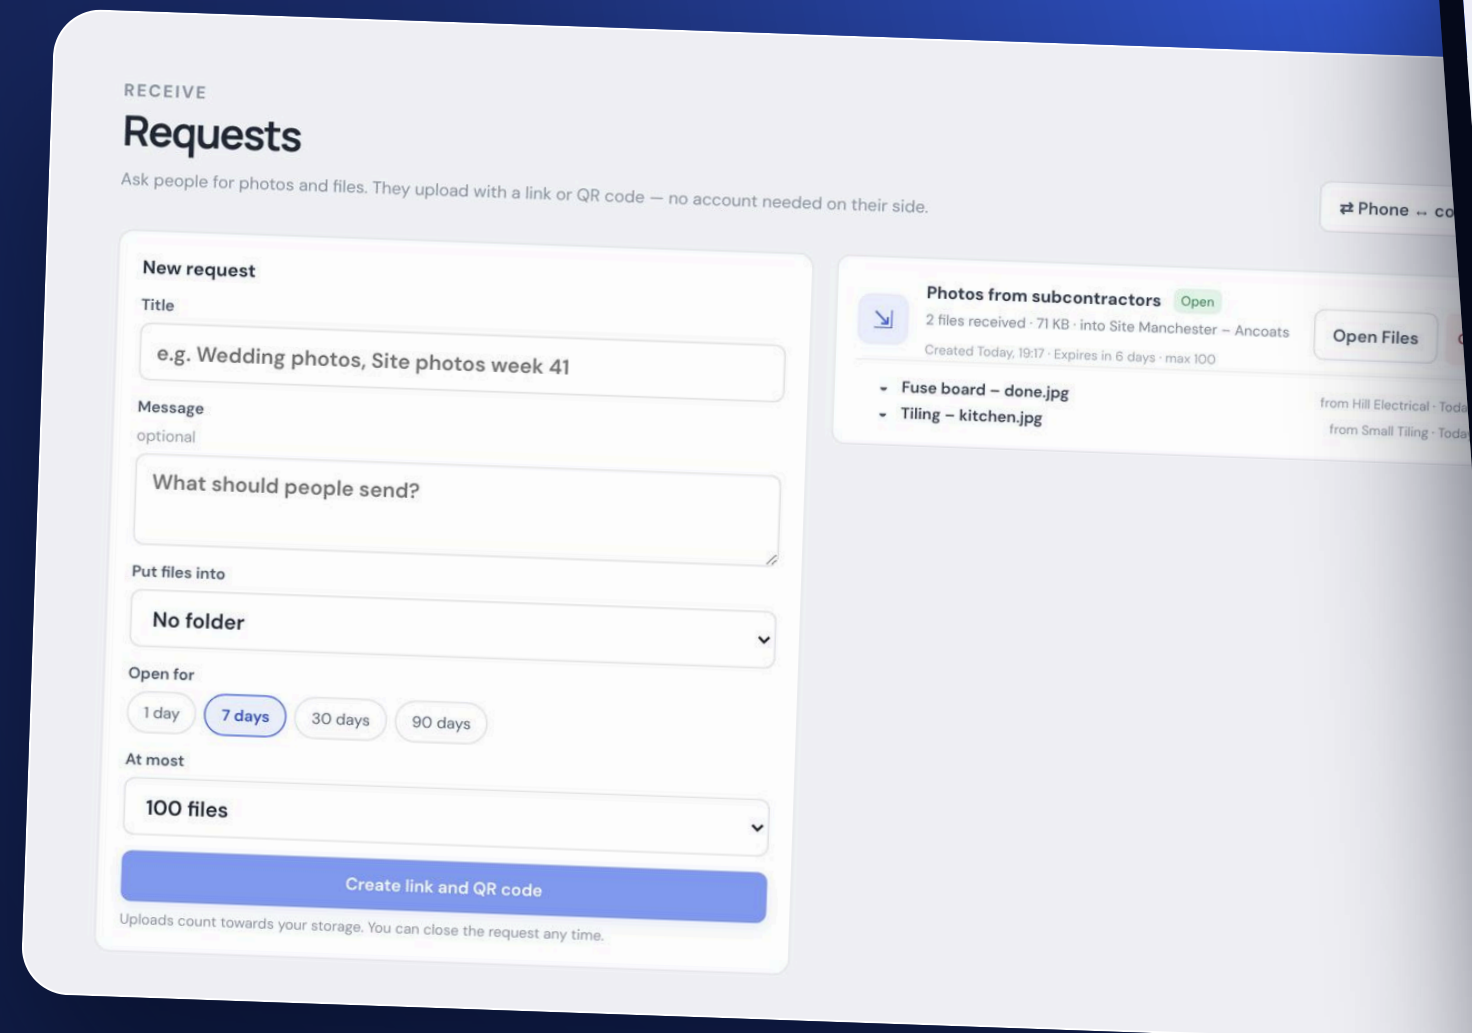

REQUESTS

Have files sent to you

One link or QR code for clients, subcontractors and guests. They upload without an account.

Files land straight in the folder you chose, with the name of whoever sent them.

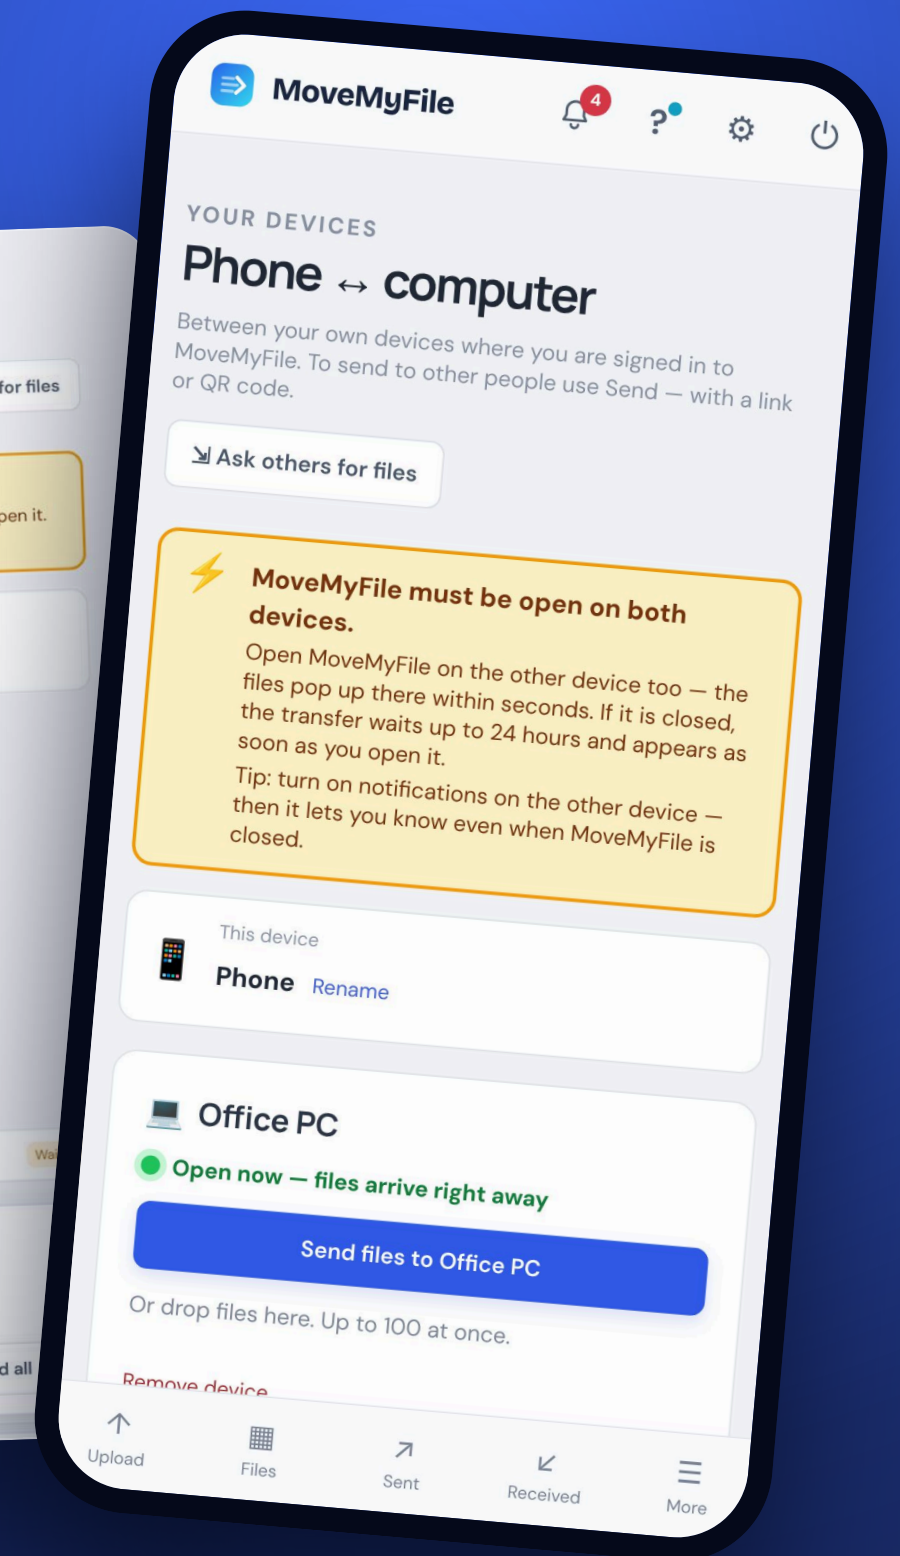

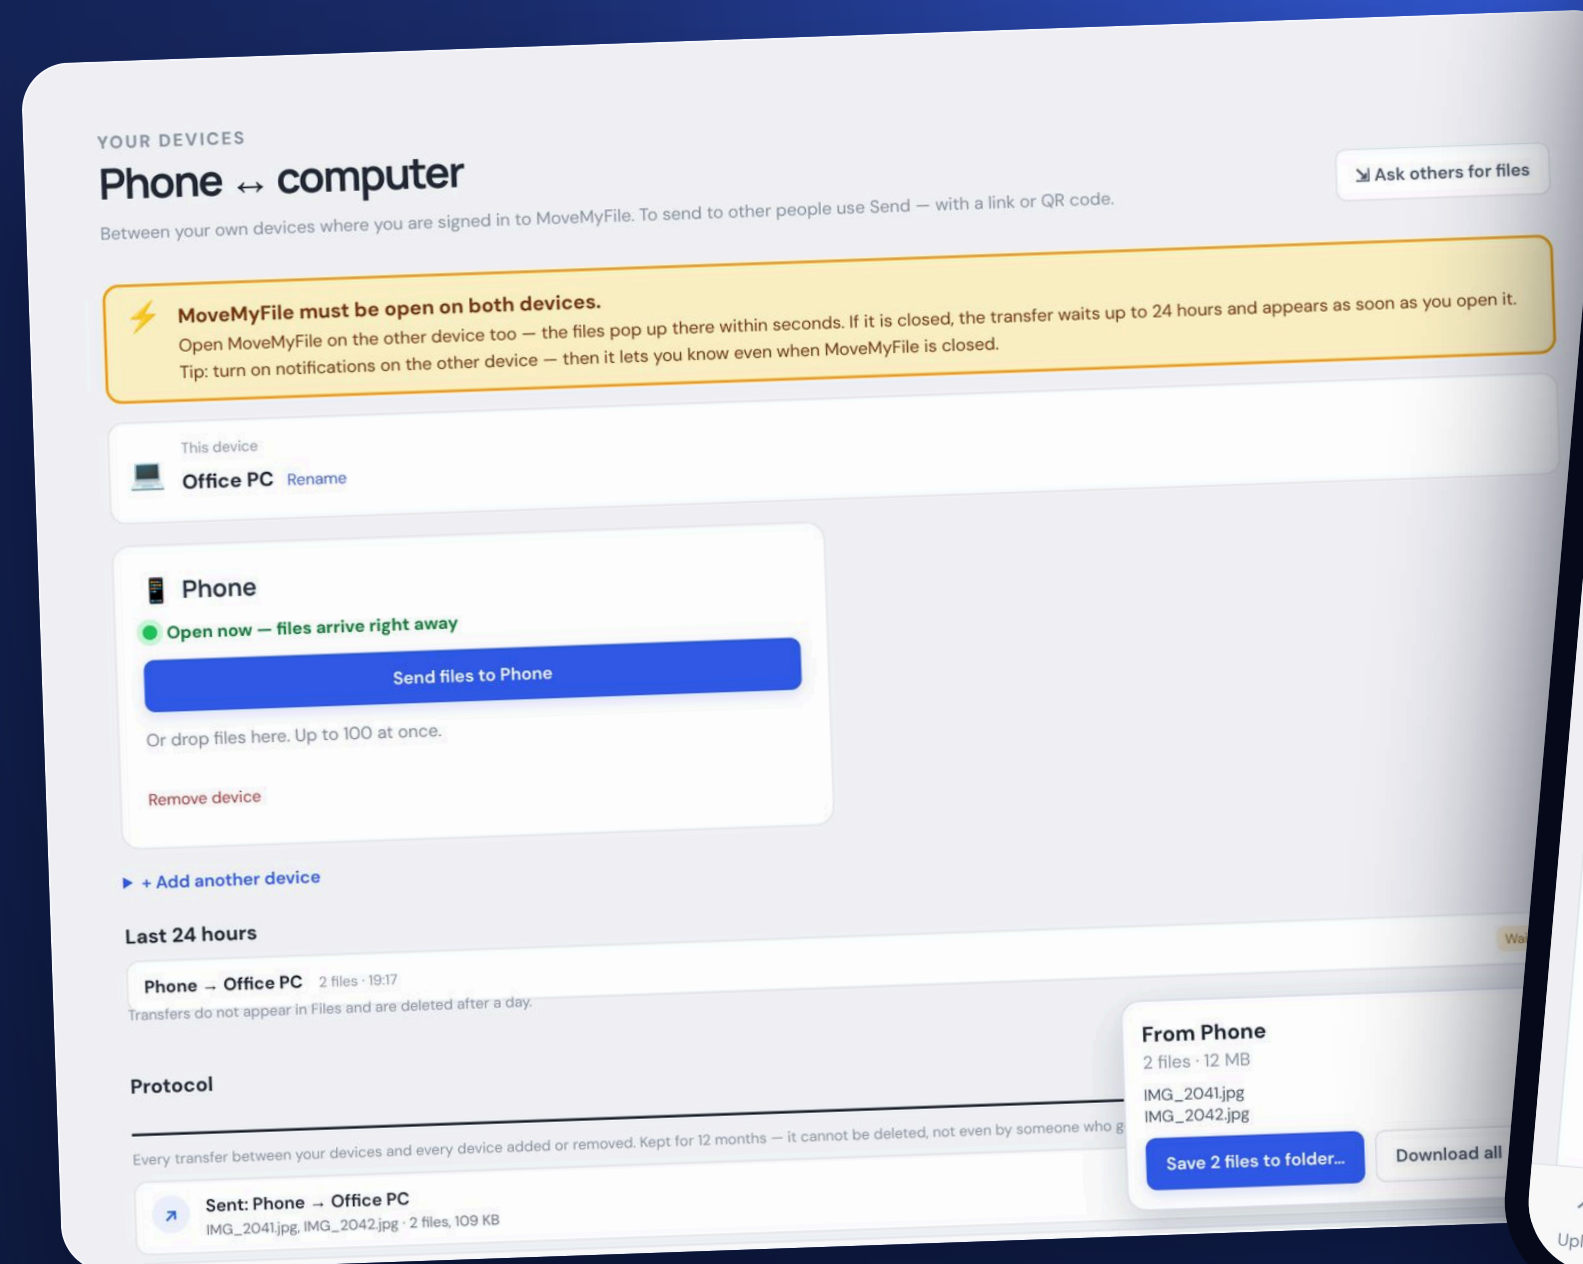

YOUR OWN DEVICES

Phone ↔ computer

Photos from your phone on your computer in seconds, and back again. No cable, no emailing yourself.

Transfers delete themselves after a day.

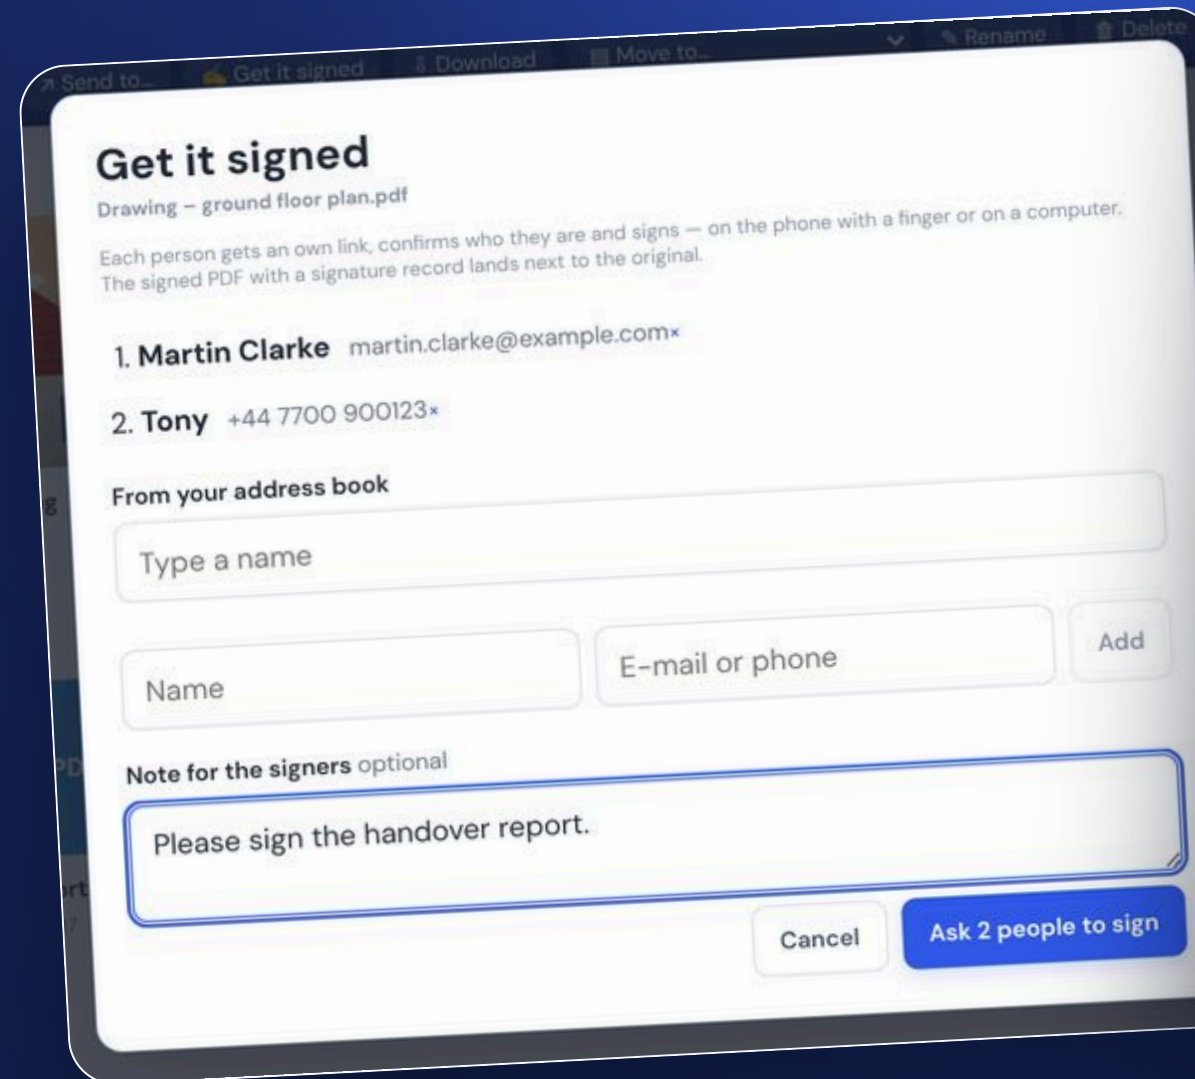

New

Sign with your finger, like for a courier

Handover protocol or delivery note: select the PDF and send it for signing. Sign on a phone or a computer.

The signed PDF with its signature record sits next to the original.

Simple electronic signature under eIDAS

Get it signed
Drawing – ground floor plan.pdf

Each person gets an own link, confirms who they are and signs — on the phone with a finger or on a computer. The signed PDF with a signature record lands next to the original.

TEAMS

A whole company, crew or site in one place

30

people for one price, not per person

1 TB

of shared files for the whole team

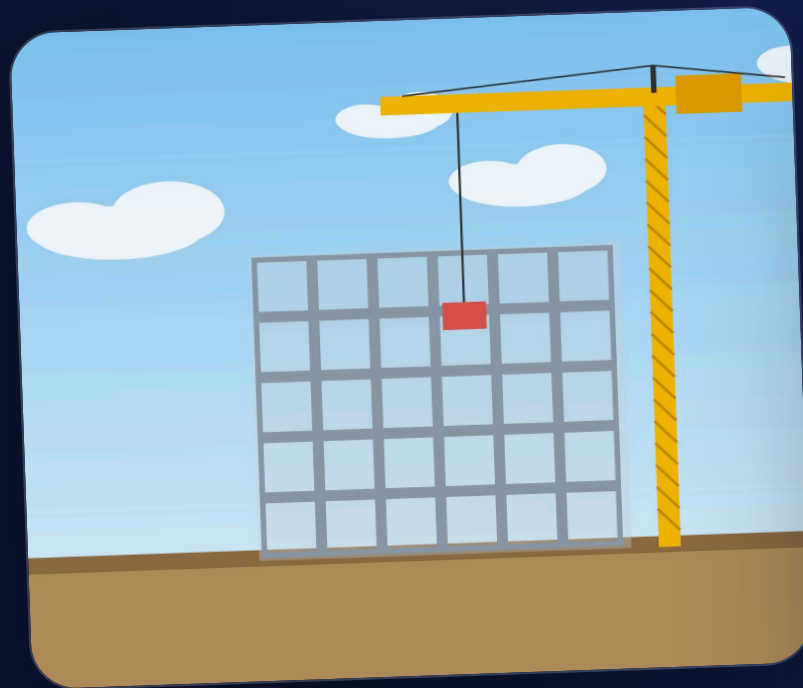

5 roles

admin, contributor, photos, documents, guest

Sharing rules and an audit log with export. Every site can have its own team.

WHERE IT HELPS

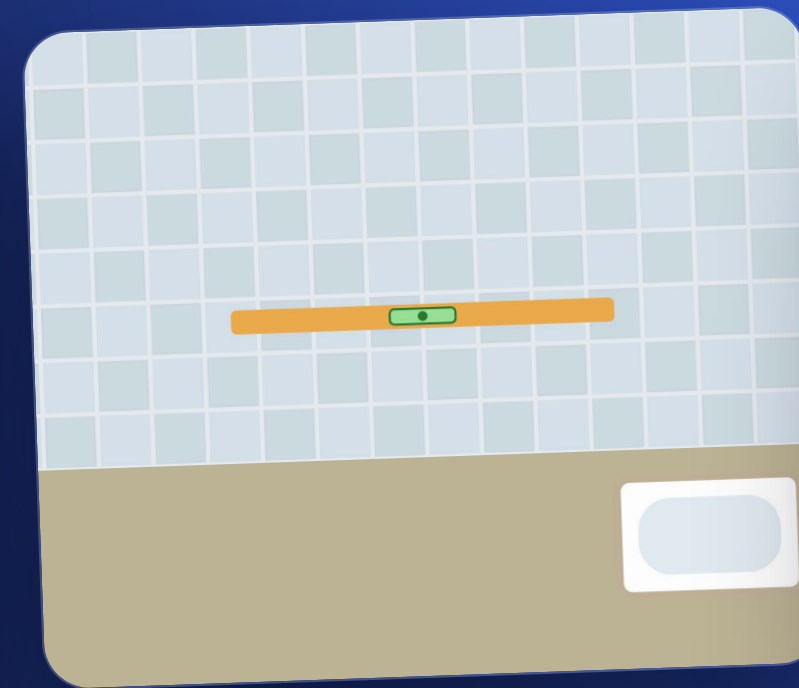

Same app, different work

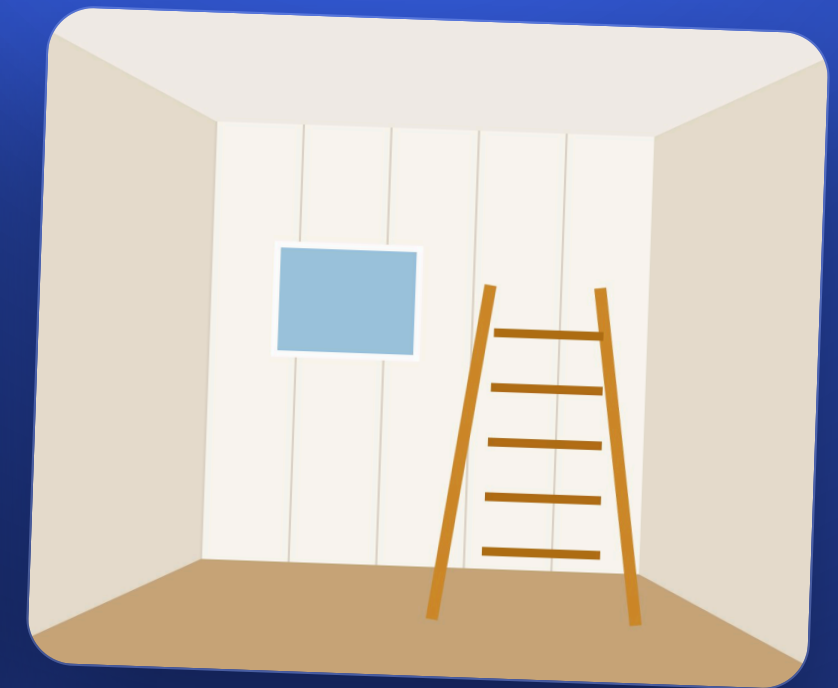

Construction

Photographer

Trades and service

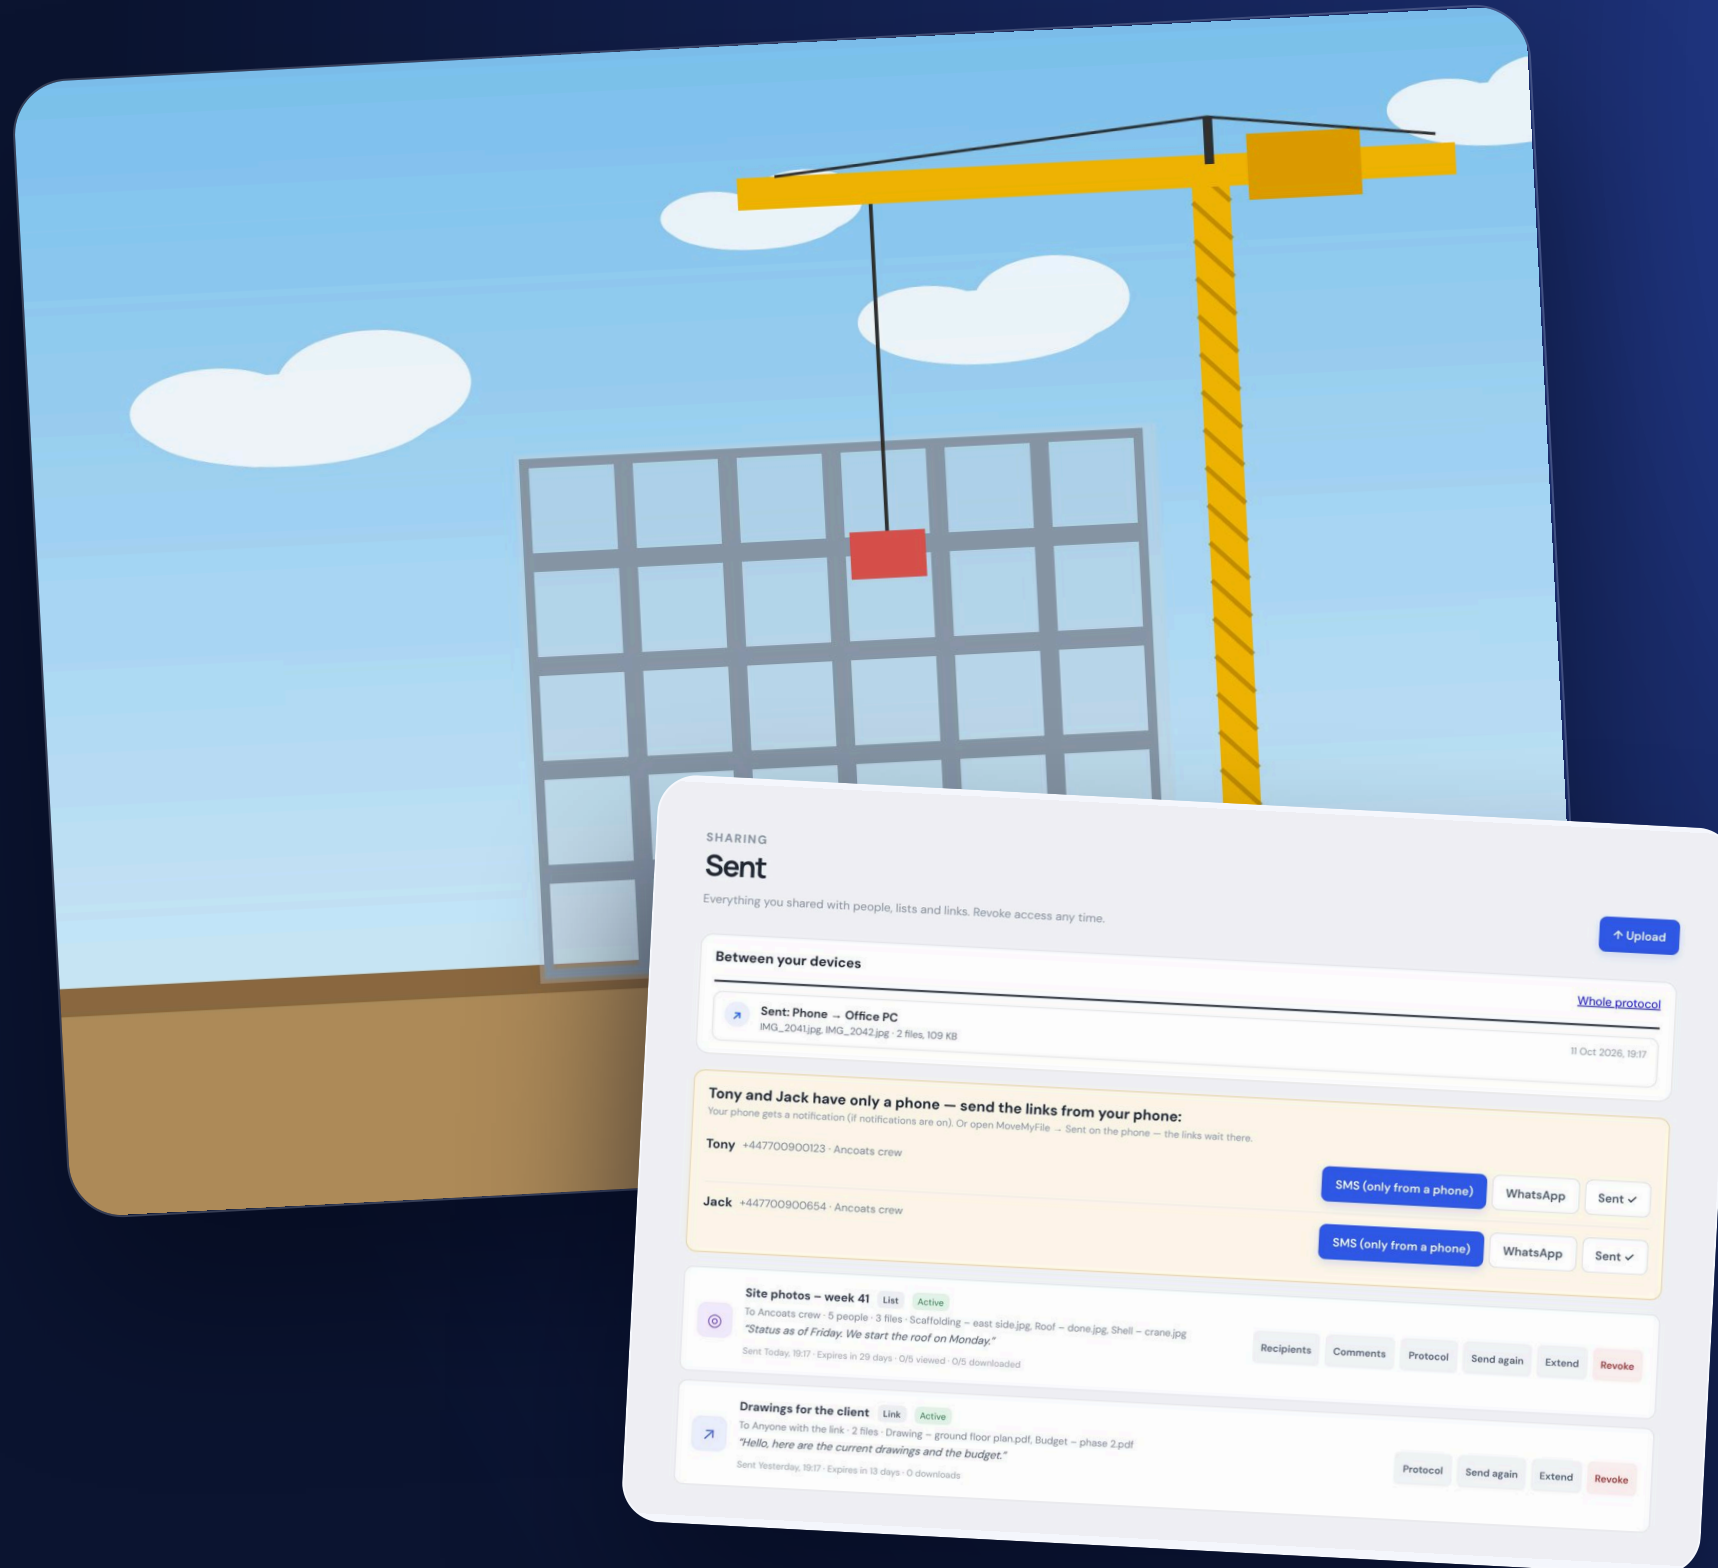

Office

Four examples in detail, then more fields where MoveMyFile saves time.

EXAMPLE · CONSTRUCTION

The site manager and the crew

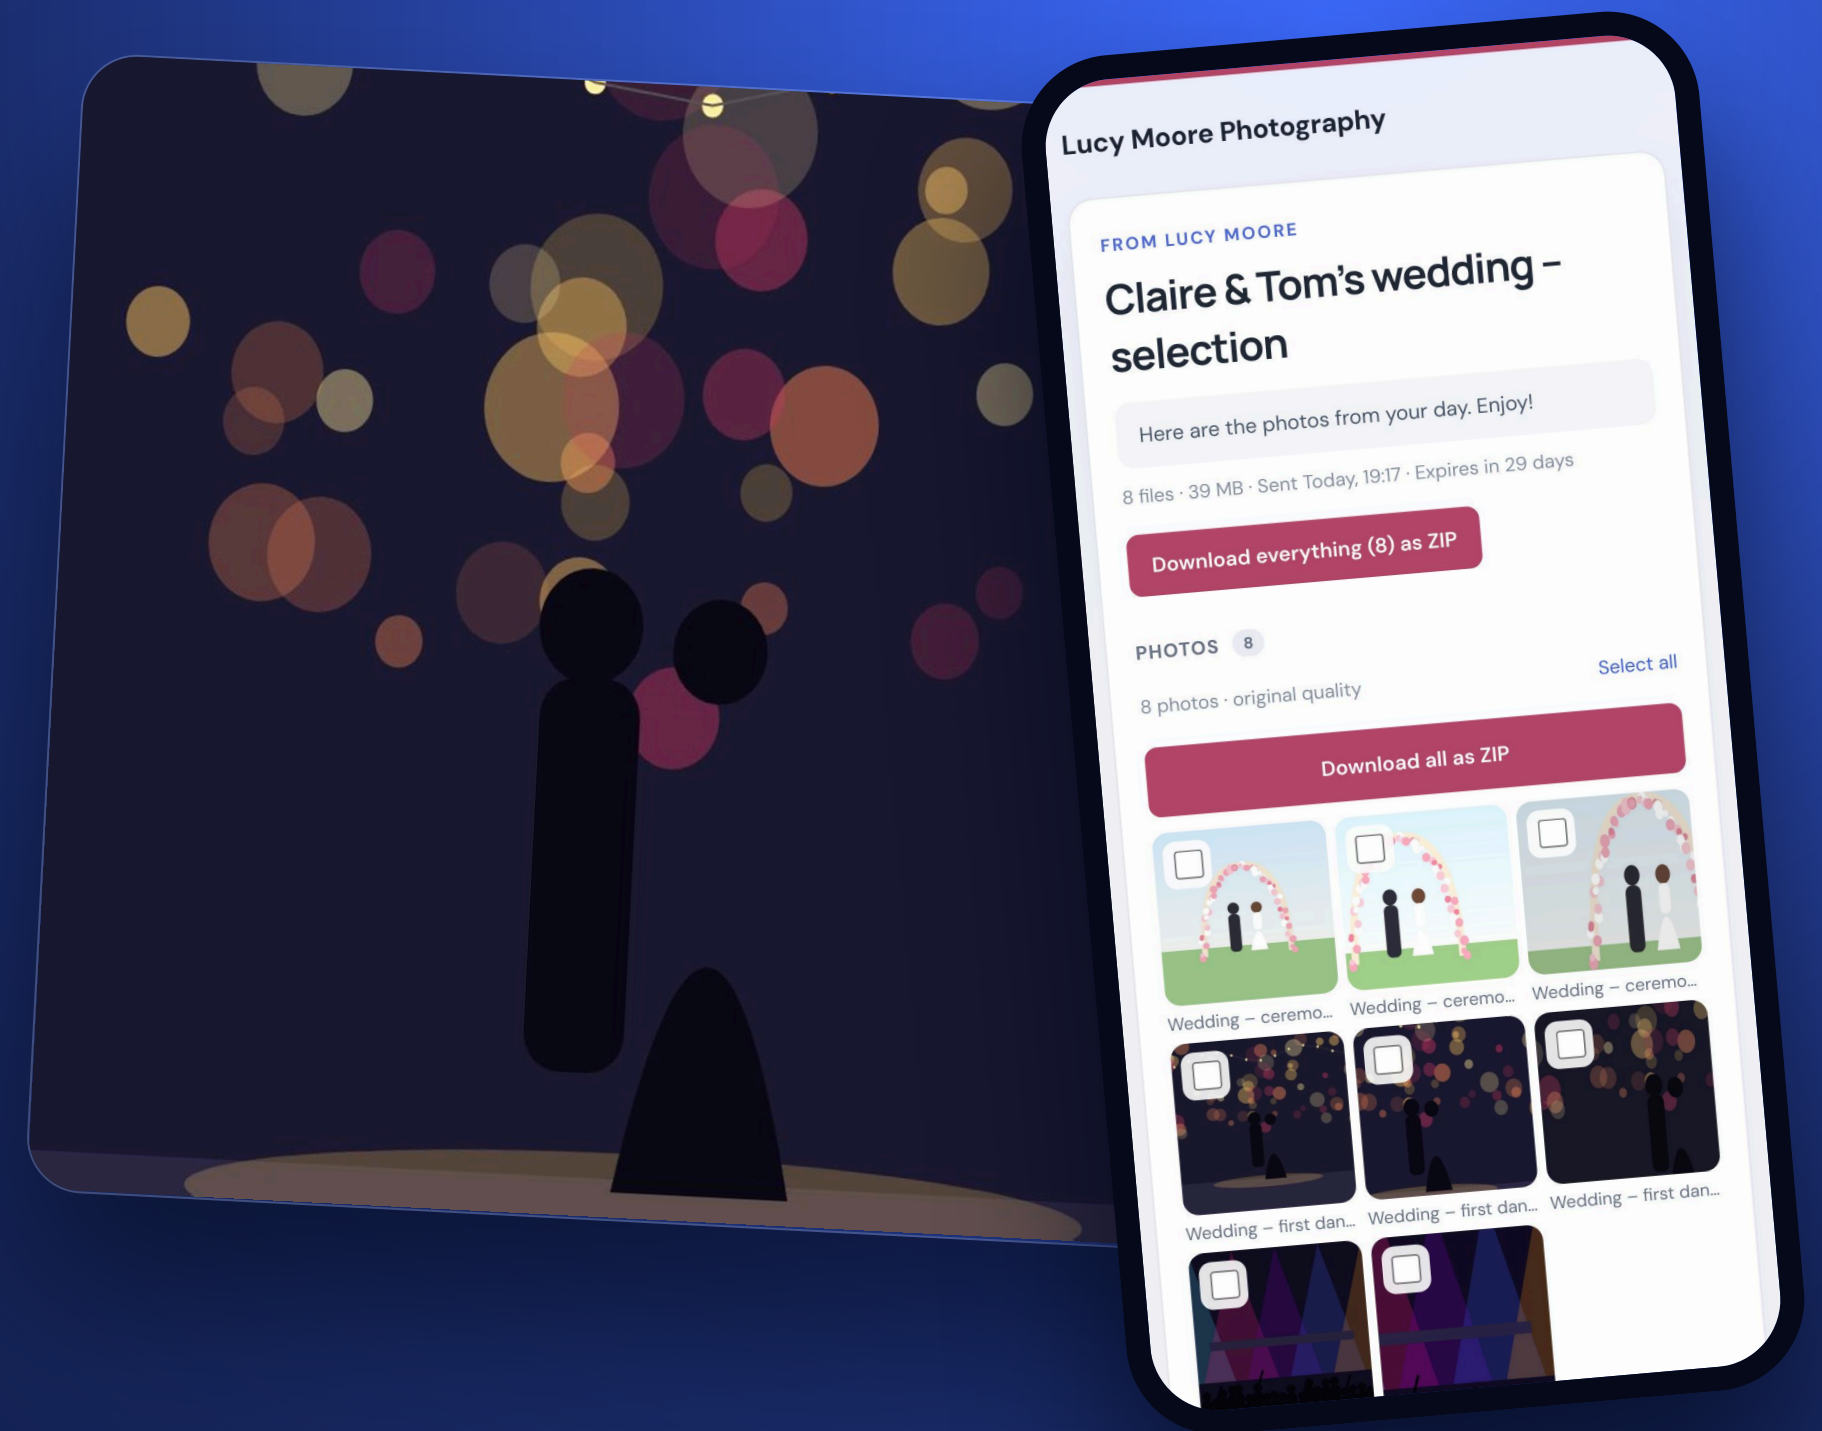

- Photos to the whole crew with one list, even to phone-only people
- 🔗 Subcontractors upload photos of finished work via a QR code
- 👍 The developer signs the handover protocol with a finger
- 📖 Protocol: who got the drawings, and when

EXAMPLE · PHOTOGRAPHER

Wedding photos for the client

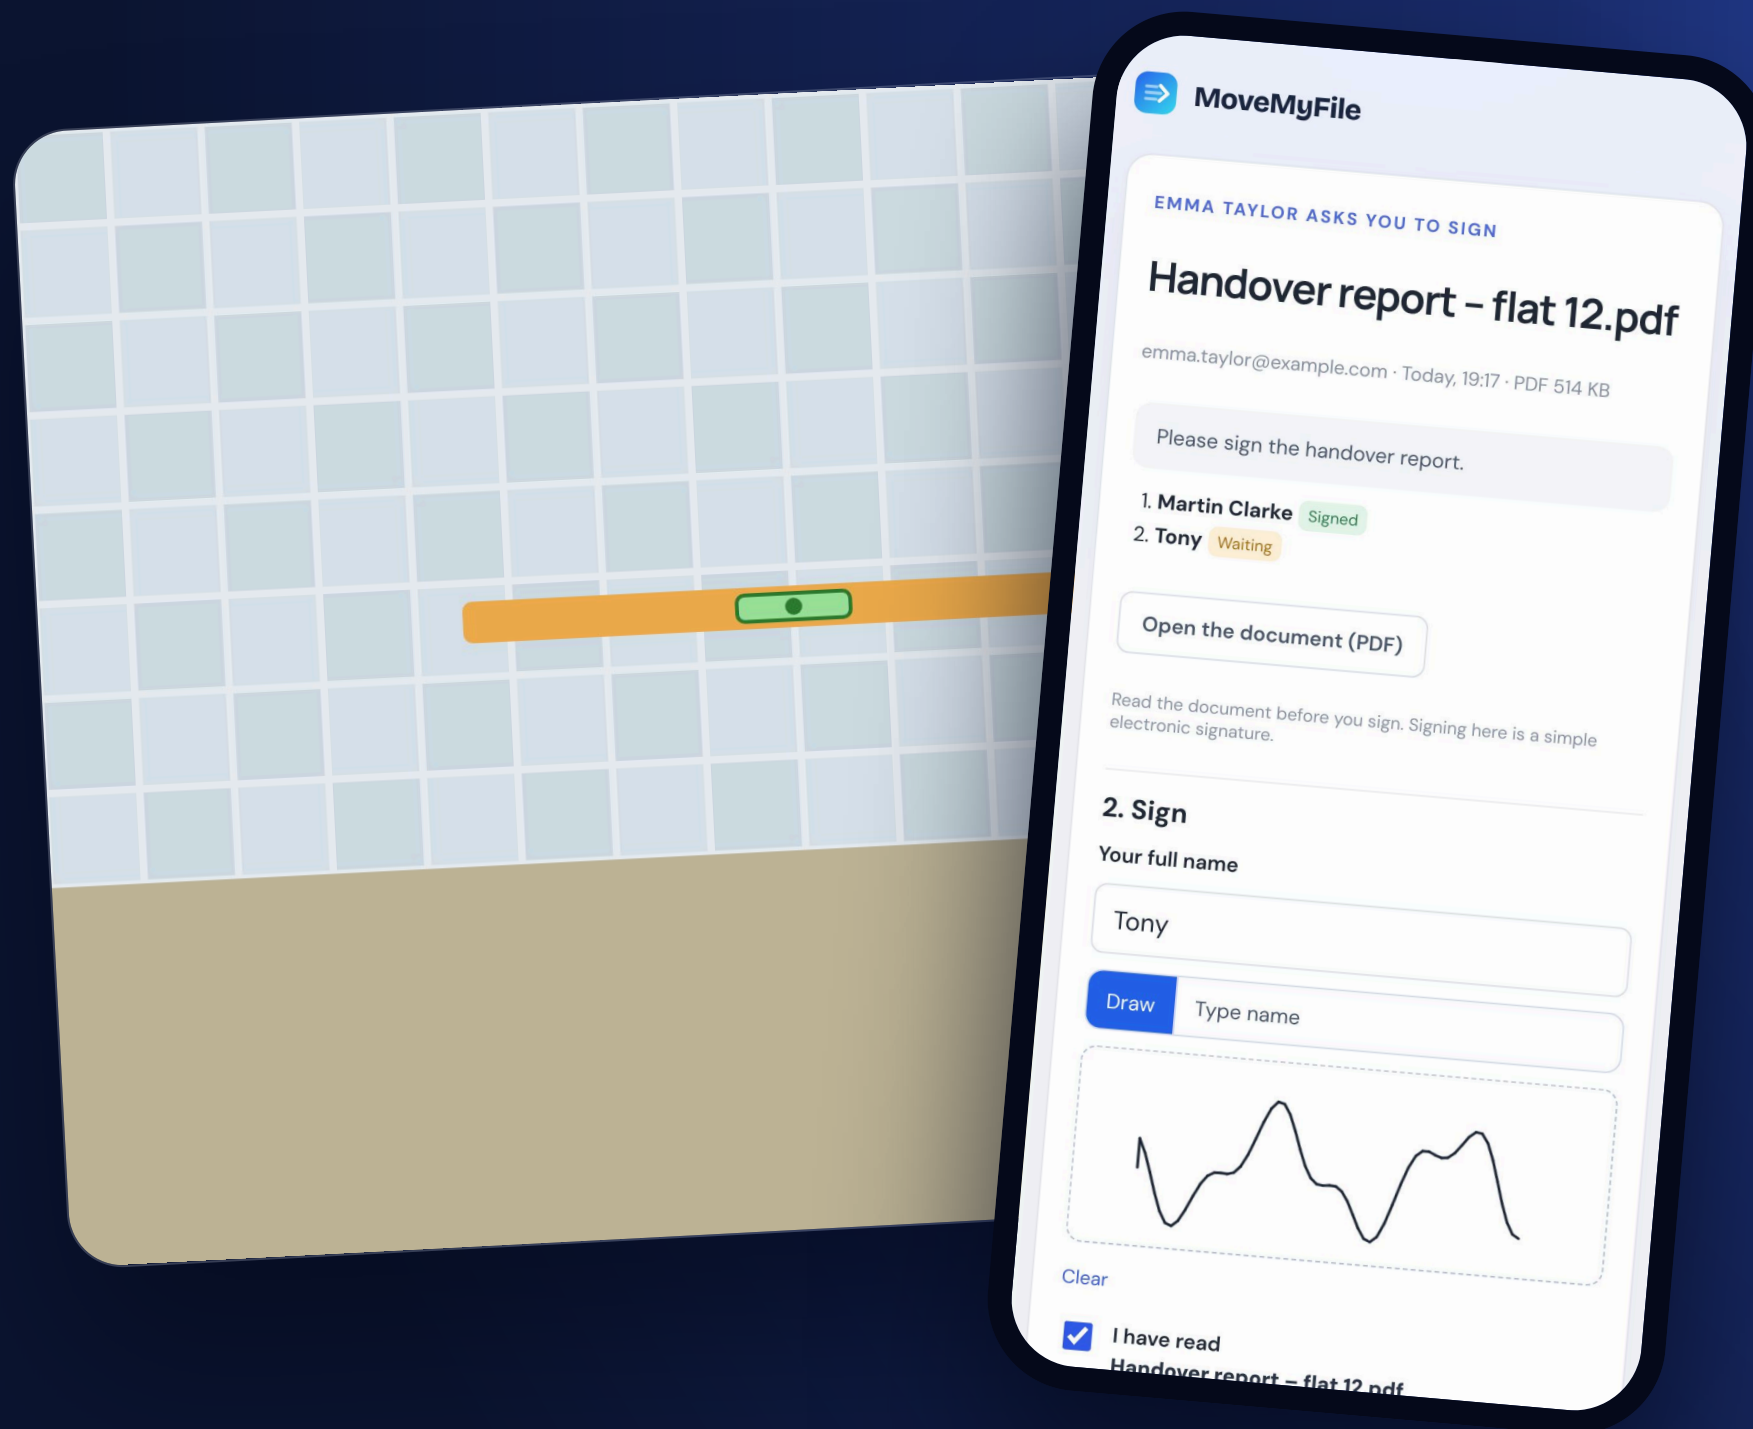

- ★ Full-quality gallery with the studio's name and colour
- ☁ The client downloads everything as a ZIP, even on a phone
- 👥 Photos from guests via one QR code on the table
- 🕒 Link with an expiry, withdraw it any time

EXAMPLE · TRADES AND SERVICE

Plumber, electrician, tiler

-  The customer sends photos of the fault via a link before you set off
-  “Before and after” photos to the customer in one link
-  Handover protocol signed with a finger, right on the spot
-  If there is a complaint, look up what the customer got and when

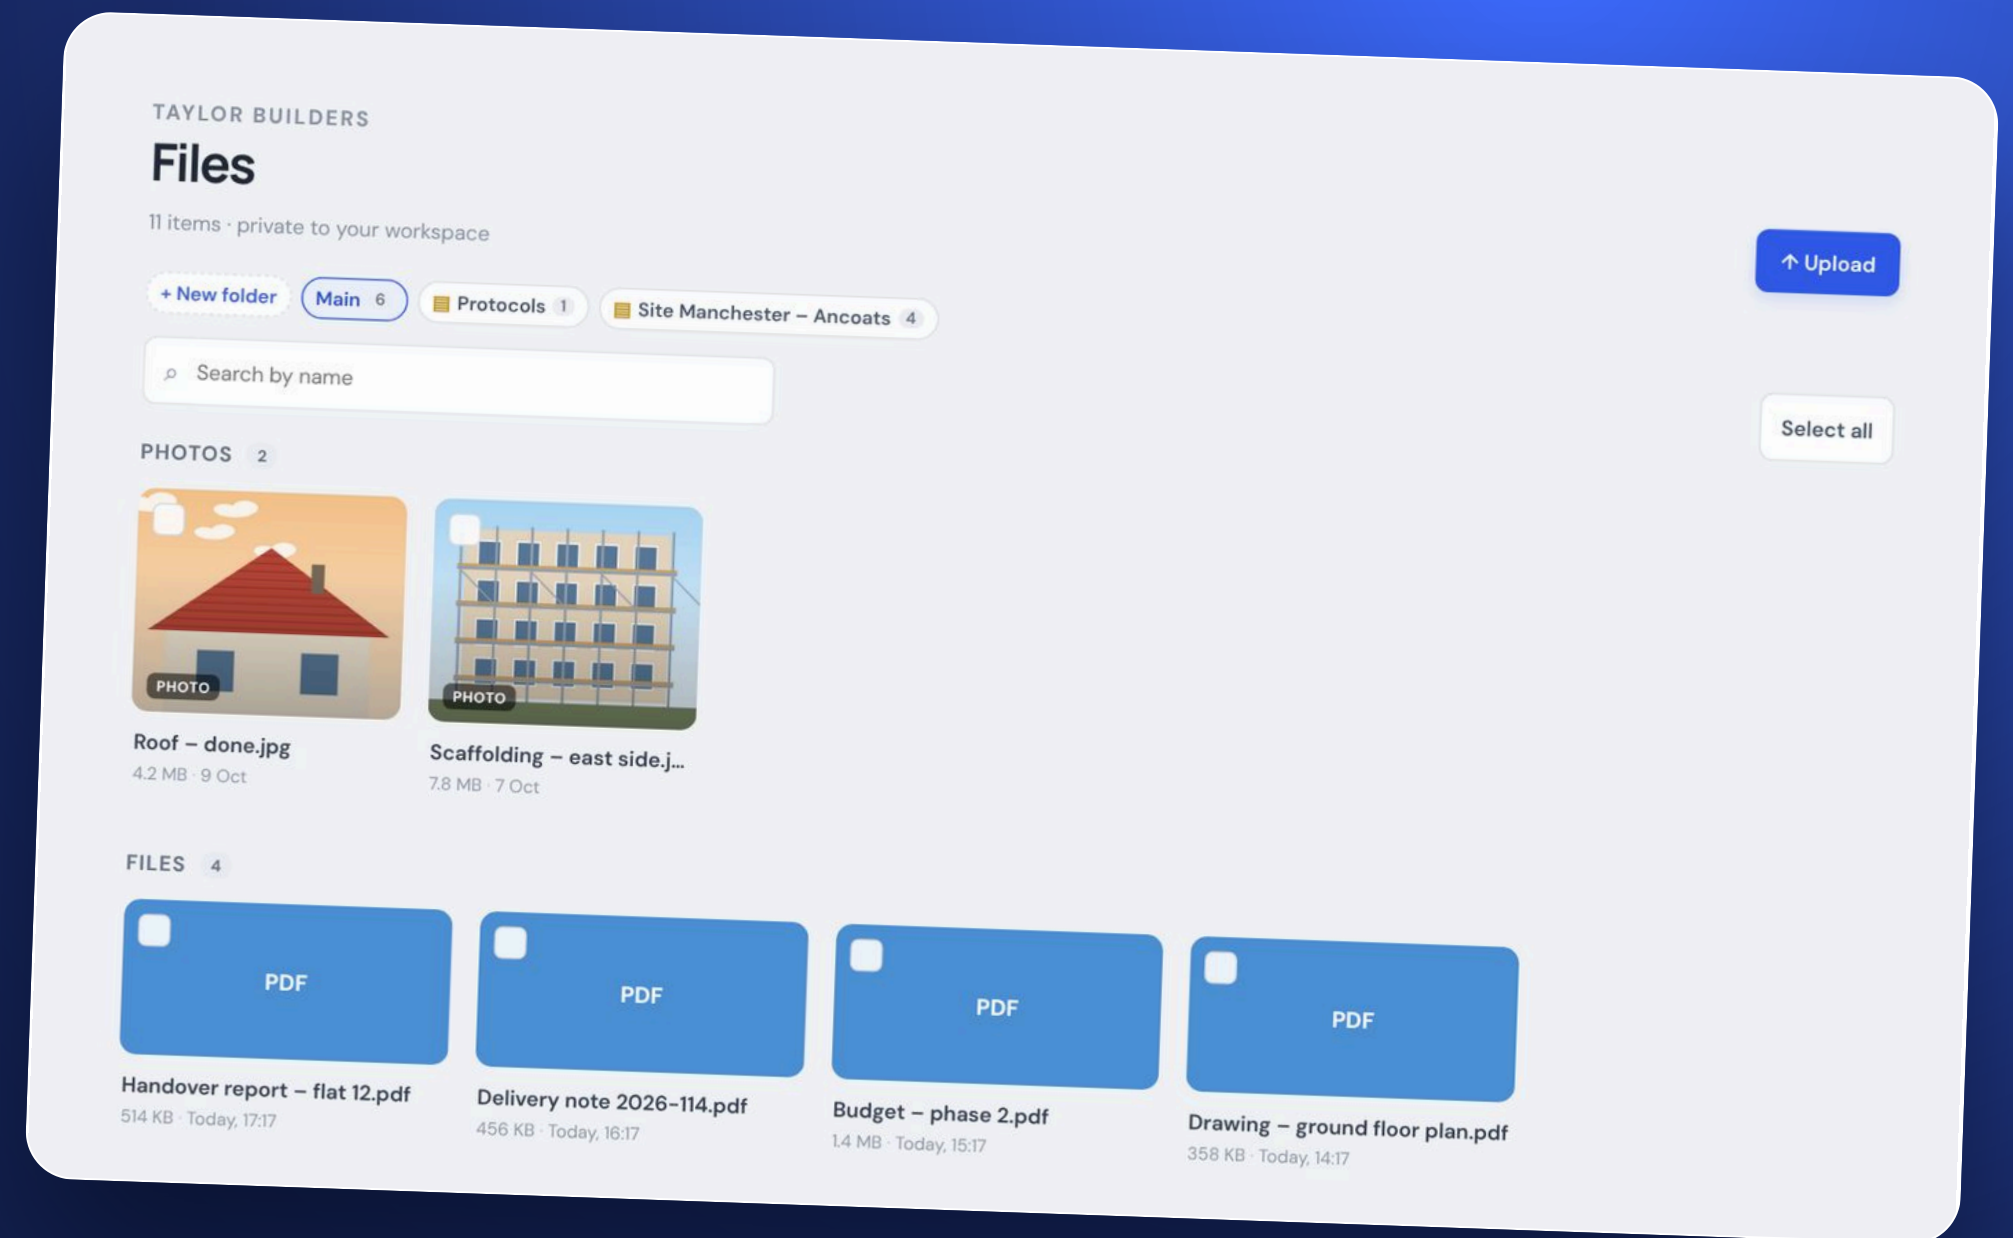

EXAMPLE · OFFICE

Office and phone

-  A photo of a receipt from your phone straight to your computer
-  A drawing from computer to phone on the way to a meeting
-  Address book and lists for repeat sending
-  Everything in folders and easy to find

Schools and clubs: Crew for a whole class at one price.

WHERE ELSE?

Anywhere files get sent

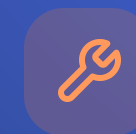

Real estate

Flat photos for the buyer, documents from the seller via a link, a signed handover protocol.

Accountants and advisers

Clients upload documents through one link. No email attachments, receipt logged in the protocol.

Car repair

Damage photos from the customer via a QR code, job sheet signed with a finger.

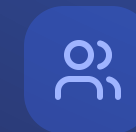

Architects

Large drawings and renderings without email limits. You know who got which version.

Events, clubs, sport

Event photos to all members with one list. Guests add their own via a QR code.

Recruiting and HR

Applicants upload their CV and documents via a link, with no account and no email.
